

Authoring Services

Need your information prepared for you? You supply the basic elements and we assemble them into a polished package that makes your company look marvelous!

We can easily download your website from the internet and get you running in no time.

Working on a software program? We can add the finishing touches to "Wow" your customers. Auto run's are our specialty.

SPIN utilizes technology to improve interactivity. Our team of professionals employ the latest digital technology to produce high quality multimedia for business and learning applications. We have several teams of multimedia designers ready to receive and complete all orders for you.

It's Easy... Just:

- ◆ Pick a Theme
- ◆ Create a "Story Board"
- ◆ Provide Us Your Info
- ◆ Watch Your Idea Come to "Life"!

The Artist Series

Feature your band in an interactive dual-mode multi-media CD!

Impress your fans and the Record Companies!

SPIN utilizes technology to improve interactivity. Our team of professionals employ the latest digital technology to produce high quality multimedia for your band or artist. We have several teams of multimedia designers ready to receive and complete all orders for you.

A dual-mode is a multi-session CD that contains both audio files (tracks, WAV, or MP3) and computer data. The first session contains the audio files, so a home or car stereo CD player can play them. The second session contains data intended for your computer's CD-ROM drive. Many music CDs are created as a dual-mode CD to provide music CD tracks and a music video all on the same CD.
